Sabbatical Leave Report

Name: ______________________________________

Date: ____________________

Sabbatical Term: _________________

On conclusion of the study, research or related activity funded by your sabbatical leave a Qualtrics survey will be sent to you to submit from the Office of the Provost. Please consider your responses to the questions below, along with which of the categories in the attached file relate to your sabbatical. Your survey will need to be submitted to the Office of the Provost within four weeks of your return to campus. If the sabbatical leave supported additional study, attach a transcript or program certificate.

Please review the sabbatical categories included on page 2 of this document that are needed for additional reporting. The Qualtrics survey will ask you to provide up to four categories that best fit your sabbatical. Please provide them in order of relevance.

Give a very brief summary of your professional activities during your sabbatical leave:

_____________________________________________________________________________________

Indicate how the professional activities during your sabbatical leave had an impact on your professional responsibilities, e.g. teaching, service research:

_____________________________________________________________________________________

Outline your plan for conducting a seminar (or similar experience) sharing the knowledge and understandings gained during your sabbatical leave with your department or other appropriate unit:
<table>
<thead>
<tr>
<th>Code</th>
<th>Category</th>
<th>Code</th>
<th>Sub-Category</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Education</td>
<td>A1</td>
<td></td>
<td>Degree seeking: Sabbatical recipient is seeking an advanced degree, i.e. masters or doctorate.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>A2</td>
<td></td>
<td>Special certification and/or licensure: Candidate is pursuing a specialized license or certificate that accrues benefit to him/herself. Generally beyond the degree necessary to maintain their faculty position. An example would be specialized training as a nurse practitioner in gerontology if they already have an MSN. Another example would be pursuit of a clinical psychologist or counselor license if they already hold degree in psychology or education.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>A3</td>
<td></td>
<td>Other education: Essentially any formal educational pursuit that does not result in a terminal degree or specialized certification/licensure. One example might be a post-doctoral leave to gain expertise in a sub-area of the person’s discipline.</td>
</tr>
<tr>
<td>B</td>
<td>Curriculum</td>
<td>B1</td>
<td></td>
<td>Course development: The candidate focused his/her attention on the development or revision of a course or set of courses for which he/she had direct responsibility.</td>
</tr>
<tr>
<td></td>
<td>Development</td>
<td>B2</td>
<td></td>
<td>Materials development: The candidate focused his/her attention on the incorporation of new materials or revised approaches (e.g., computerized slides of micro-organisms or computerized exercises in topography) for a course or set of courses for which he/she had direct responsibility. Seems logical to include revisions of lab manuals, workbooks, and other such curriculum-related materials here.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>B3</td>
<td></td>
<td>Other curriculum development: The candidate focused his/her attention on the revision of a larger curriculum on behalf of the department/division/institution. Examples might include involvement in semester conversion for the department/division/school, or some other assignment which took curricular development to a level beyond a small, narrow revision of a course or set of courses for which he/she had direct responsibility.</td>
</tr>
<tr>
<td>C</td>
<td>Professional</td>
<td>C1</td>
<td></td>
<td>Teaching oriented: A program of personal/professional development which addresses improving one’s teaching effectiveness. The activities this covers could be quite wide-ranging, from learning how to use specific computer programs enhancing one’s lecture/lab presentations, to examining a trend in classroom or student assessment, to serving as a lecturer in a special context (e.g., at a historically Black college or at an overseas university to gain either a diversity or global perspective) which might enhance one’s teaching in a general way.</td>
</tr>
<tr>
<td></td>
<td>Development</td>
<td>C2</td>
<td></td>
<td>Research oriented: A program of personal/professional development which addresses improving one’s research ability/effectiveness. The activities this covers would not be seen as specifically pursuing a research agenda, like researching the effects of global warming on a specific habitat, but rather a general program intended to increase one’s skills in methodology, application, or interpretation.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>C3</td>
<td></td>
<td>Not used</td>
</tr>
<tr>
<td></td>
<td></td>
<td>C4</td>
<td></td>
<td>Other professional development: Generic programs of revitalization, like travel and semi-structured reading, which help faculty expand their horizons in a general, rather than specific, fashion.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>C5</td>
<td></td>
<td>Creative endeavors/performances: For dramatic and performing artists, the creation of works of art (poems, paintings, symphonies, etc.). This was NOT used to designate publication efforts in a specific discipline (including the arts). If the product of the sabbatical’s efforts was a published article/book, it was generally attributed to the research function (see below).</td>
</tr>
<tr>
<td>D</td>
<td>Research</td>
<td>D1</td>
<td></td>
<td>Research: This category was intended to exemplify participation in specific, focused research endeavors unrelated to direct classroom incorporation (e.g., global warming, the history of wild rice production in Minnesota, emerging international marketing systems). This category was not applied to the enhancement of individual research skills (that’s C2 above). This category was used for categorizing production of articles, manuscripts, books for publication.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>D2</td>
<td></td>
<td>Other research: Research endeavors which did not focus on specific topics and were not curricular in nature. Essentially a residual category and might include something like an apprenticeship or working in a prominent researcher’s laboratory.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>D3</td>
<td></td>
<td>Curricular research: This category was intended to exemplify participation in research endeavors focused on the revision of a larger curriculum on behalf of the department/division/institution based on an empirically driven assessment. Examples might include examination of writing across the curriculum at the upper division, incorporation of writing or diversity in the natural and biological sciences, multi-disciplinary degree options, conversion to self-paced learning modules in a specific discipline, etc. Would seem the most relevant code for situations where sabbatical focused on visits to other institutions to observe different pedagogical approaches.</td>
</tr>
<tr>
<td>E</td>
<td>NEC</td>
<td>E1</td>
<td></td>
<td>An old Census Bureau term, not elsewhere classified (NEC), meaning miscellaneous or residual category, that it simply doesn’t fit any of the pre-established codes.</td>
</tr>
